

The 400 “TOUGH GUY” Series

Alternator, Generator and Starter Tester with Variable Speed and Recording Capabilities

Model K-475DVP

The **K-475DVP** has been specially designed to test alternators, generators and starters for light cars to heavy duty trucks. This 7.5 HP Tester has 6 preset loads to test for maximum performance and an electronic variable speed control which allows testing at RPM levels of from 0 to 6000. The use of digital meters increases accuracy and makes it easy for the operator to read. During testing the newly added computer to the **K-475DVP** allows the operator to save the test results and to print them at the end of the trial. These results are easily identified by a computer-generated serial number given to each test.

In addition to these features the **K-475DVP** will also print a label and a report which include the equipment model number, the serial number for the test and the test results.

Features:

- 7.5 HP, 230VAC 1 or 3 Ph motor.
- Electronic variable speed.
- (3) Digital Meters to measure voltage, current and RPM.
- (1) Analog ammeter 10-0-10 for testing field current
- Duplicate automotive circuitry.
- Test 12 and 24 volts with built-in selector switch.
- A or B field circuit capable.
- Motor reverse switch.
- HD Filed rheostat.
- Field circuit protection, 10 Amps fuse breaker.
- Indicator light for testing units using diode trio.
- External voltmeter switch.
- Manual mounting vise.
- Three step pulley (3", 4" and serpentine pulley.
- 6 preset loads, fan cooled.
- 28 test leads included.

PC/Print features:

- Microsoft Windows XP Home Edition
- Hard drive 40 GB.
- 256 MB of Ram.
- Processor AMD Duron 1.2 GHz.
- Flat Screen 15"
- Mouse.
- Numeric key pad.
- Flexible keyboard.
- Inkjet color printer.
- 4" Barcode printer. (Optional)
- 12 month warranty.
- Tester dimensions:
24"Wx28"Hx48"D.
- Shipping weight. 280 lbs.
